

PRESS RELEASE

# AI workshops at anniversary price

## 40 limited AI workshops until end of July 2023

Bubenreuth, 14<sup>th</sup> of March 2023

- 40 AI workshops at the anniversary price of 1,000 €
- cross-sector offer
- starting point for professional data analysis and AI projects

infoteam Software AG is celebrating its 40th anniversary and the Data Science department is joining in the celebrations. At [www.infoteam.de/en/ki-workshops](http://www.infoteam.de/en/ki-workshops), it is therefore offering 40 AI workshops up to the end of July 2023 at the special price of 1,000 euros. The offer serves as a starting point before any development of an AI system or other professional data analysis. The goals are:

- Getting to know each other
- Identifying use cases (Are there already ideas or concrete requests for improvement on the customer side and are data-based solutions for these possible and useful?)
- What data is required for the use cases?
- Is data already available and how can it be used?
- Creation of roadmaps for the respective use cases

## Who are AI workshops interesting for?

AI workshops are interesting both for companies with concrete ideas and goals and for companies that already collect data without a concrete goal and now want to find out what options for action this data offers them. A workshop usually takes one day and specifically addresses the situation and questions of the respective customers. A summary of results following each workshop also provides companies with a time-delayed opportunity to re-evaluate and follow up on ideas and projects, or to take concrete steps to create the conditions for data-based solutions.

Patrick Kraus  
Marketing Communications Manager

### **About infoteam Software Group**

infoteam Software Group has been implementing unique software solutions for their customers in the industry, infrastructure, life science and public service markets for almost 40 years. Its core business comprises the partial and total development of control and embedded software, middleware and application software – agile, modern and in line with the latest security requirements. Special areas of expertise include normatively regulated software for use in medical and laboratory equipment (IVDR, MDR, FDA, ISO 13485, IEC 62304, etc.) as well as functionally safe software at the highest safety level (IEC 61508, EN 50128, etc.). The service portfolio is well rounded as a result of many years of experience in data analysis, AI and machine learning.

infoteam Software Group employs more than 300 people and many offices and subsidiaries in Europe. The parent company, infoteam Software AG, is headquartered in Bubenreuth in the Bavarian metropole region Nuremberg, Germany.
