Thaumatec HealthTech Academy Innovation projects 2023

SteadiSpoon

“ The concept behind the Thaumatec HealthTech Academy stands out as something truly distinctive and novel to me. It's unlike anything I've encountered before. ”

Unleash the Future of Health Tracking! Dive into a cutting-edge mobile app tailored for tracking health in Parkinson's patients. **Monitor well-being and disease progress effortlessly through interactive surveys and exercises powered by your phone's advanced gyroscope and accelerometer.** Enjoy an intuitive interface and precision data collection, revolutionizing Parkinson's management. Elevate insights for individuals and healthcare providers alike – a leap forward in health technology!

“ The project's communication has consistently been top-notch, contributing significantly to its seamless execution. ”

Introducing a breakthrough device for strengthened pelvic muscles! Unlock personalized support with multiple chambers, dynamically inflating and deflating to meet your needs. Witness the power with an OLED screen displaying the active chamber's pressure. But that's not all – our smart mobile app takes your journey to the next level. **Experience diverse training modes like strength, endurance, and cognitive exercises, all at your fingertips.** Tailor your workouts with our versatile setup feature, making every session uniquely yours!

ZENZEN

“ We are very happy with this partnership! ”

Elevating the Pregnancy Journey! Our virtual assistant phone app, born to enhance the quality of life for diabetic moms-to-be, is back with even more magic. **Navigate a stress-free and healthy start by effortlessly maintaining a proper diet, monitoring blood glucose levels, and tracking daily activities.** ZenZen application is your partner for a stress-free and healthy start on the journey of new beginnings for both mothers and infants!

AGORA SOLUTIONS

“ The project was handled excellently. ”

A groundbreaking marine algae farm control device! LoRaWAN-connected prototype measures pH, temperature, and water salinity, providing real-time insights with minimal operator interaction. **The cherry on top? A cutting-edge cloud service that not only receives and stores data but also visualizes it in dynamic timeseries.** Stay tuned as we set the stage for field testing in challenging environments. The future of water quality control is here!

Innovation Talent Program

THAUMATEC
HEALTHTECH
ACADEMY

During the program talents from the universities are matched with promising, international HealthTech start-ups to boost the development of its HealthTech solutions.

Startups applying for the program can win Thaumatec startup credits, powering their journey towards success.

The first round of program in 2023 received about 100 applications, leading to the selection of 21 diverse talents, including frontend developers, embedded specialists, QA testers, and AI enthusiasts. Additionally, 4 international startups from Germany, the Netherlands, and the USA were chosen out of over 20 applicants.

Duration: August – September

Innovation Talent program:

Part internal development at the Thaumatec HealthTech Academy, part actual experience working with an international HealthTech start-up

Mentorship:

A dedicated mentor for every participant that will provide support throughout the program

Architects/ Experts:

Thaumatec will make available its Architects and Experts to provide support to the participants and start-ups during the program

Program:

Week 1 – Onboarding and bootcamp

Week 2-8 – Work within the team of an international HealthTech start-up

Week 8 – Wrap up and lessons learned at Thaumatec

Bring your idea to life with Thaumatec Start-up Credits

Benefit from mentors with **international certificates, experts in their fields**, guiding you through challenges.

Get the gear you need to deliver faster

Unlock HealthTech innovation with best-in-class tools and tech tailored to your needs.

About the Thaumatec HealthTech Academy

Thaumatec HealthTech Academy is an interactive space for curious minds to explore how the Internet of Things and Artificial Intelligence can improve people's health, well-being, and quality of life.

At the Academy, people from all experience levels and skill sets come together to exchange knowledge and explore novel ways that the Internet of Things and Artificial Intelligence could be harnessed to improve people's health, well-being, and quality of life.

What sets Thaumatec HealthTech Academy apart from other programs is our comprehensive training & development program, open enrollment, online and in-person training options, and exceptional job placement training. At the end of our program, graduates are well-rounded and ready to take part in more complex projects.
